MATERIAL MANUFACTURED TO FED SPEC RR-W-410D TYPE I CLASS 2

6X19 Class General Purpose Wire Ropes

6X19 class wire ropes are generally considered to be the work horse of the wire rope industry. It is very popular due to its resistance to abrasion while maintaining a good degree of flexibility. It is a very popular rope for uses such as wire rope slings, winch cables, crane cables, hoist cables, drill lines, chokers, etc. Alps Wire Rope Corporation stocks three specific constructions within this classification to meet the specific needs of different industries. Those constructions are: 6x19(S), 6x25(Fi), and 6x26(WS).

These ropes are available in Right and Left Lay, Regular Lay, Lang Lay, and Alternate Lay
